Music (Week 5) – April 20-24
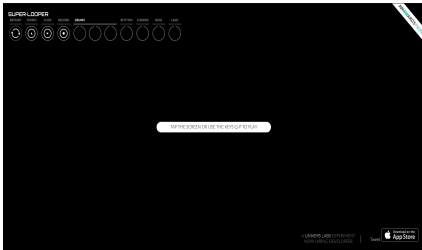

This week, we are going to use SUPER LOOPER to make music.
Let's get started!

1. **Click here:** http://superlooper.universlabs.co.uk/
    It may take a minute or two to load, but it is worth the wait!
    NOTE: iPad user can download SUPER-LOOPER by Univers Labs from the App Store.

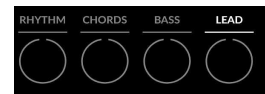

2. Use your **keyboard** to create music. Press Q-P on your keyboard to make sounds
    (Q, W, E, R, T, Y, U, I, O, P).

3. Let's make a **LOOP**! It will make our music repeat. To do this, look at these **four circles**:

    -   Click one of the circles.
    -   Start playing for a few seconds.
    -   Stop playing. Your music is now looping!
    -   Click on a different circle to add another loop.

4. Before we add drum sounds, look at these:

    -   RESTART will delete your work.
    -   TEMPO will change the speed.
    -   CLICK will help you play on beat. Select this with your mouse before your first loop is made.
    -   RECORD will save your work. NOTE: this is note required. Sometimes the server is too slow.

5. Add some drum sounds! Click on one of the three circles under DRUMS.

6. Last week, a few people had trouble with Adobe Flash. You will not need it for this project, but please write me at jay.sager@ps158.net or Google Classroom if you have any questions!
